

Dedicated to Providing the Ultimate Health & Hygiene Protection for Travellers

Using an Impregnated Net

Zi Technology

Pyramid Premium Nets are treated with Zi Technology, a combination of Permethrin with a unique binding substance. It kills insects on contact and lasts up to 2 years or 35 washes. The treatment is water resistant and long lasting for your protection.

The only net from our range that is not treated is the Cot Bell Net, due to the increased risk of ingestion by young children.

Permethrin insecticide treatment is recommended by The World Health Organisation and deters insects from biting through the netting. It has been used for decades and has an excellent safety record.

Revive Your Net

To extend the life of your net further use our Net Treatment Liquid, which re-impregnates nets for 6 months or 4 washes.

This means your net can keep providing the best protection for many years to come.

Every effort is taken to ensure that the information published on this website is accurate and informative. It is not intended to replace a consultation with an appropriately qualified medical practitioner.

Pyramid is a specialist manufacturer of travel products, providing The Ultimate Protection against insect bites, dangerous bacteria and water borne diseases.
