

Dedicated to Providing the Ultimate Health & Hygiene Protection for Travellers

Using the Pop Up Dome Net

This compact net is fully self-supporting and requires no fixing or hanging. It gives fast protection from biting insects and it can be used outdoors over a sleeping bag or on a single bed. Durable and sturdy, this net will stand up to regular and prolonged use. There is plenty of skirt material to tuck under your sleeping bag for extra security.

Setting Up

Remove your net from the bag and carefully open to uncoil the struts. Arrange the dome and netting over your sleeping area. Tuck the net skirt under your mattress or sleeping bag to ensure a tight fit. If you are using the net outside the sides can be pegged down.

Packing Away

Remove from the bed and lay flat with the struts together. Take hold of the top point of the net and the centre of the base, twist in opposite directions and close to make a circle. Then gather the fabric together and wind around the struts to secure. Place the net back into its carry bag.
