

DEFEAT MALARIA

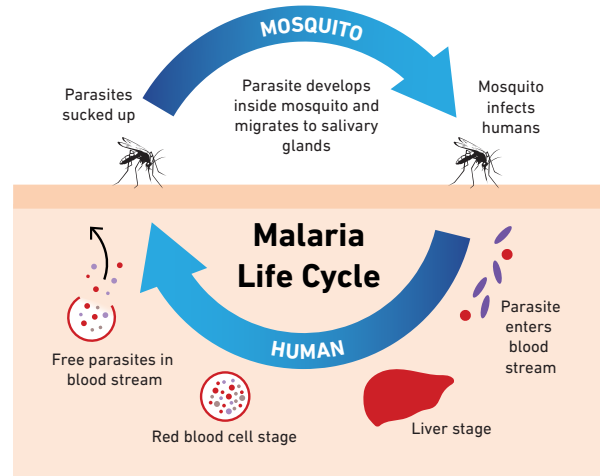

Think Prevention First

- An estimated **214 million** cases occur each year
- Every **2 minutes** a **child dies** from Malaria
- It remains a **health risk** for 3.2 billion people, half of the world's population

What Causes It?

Plasmodium parasites are dangerous parasites, transmitted to humans through the bites of infected Anopheles mosquitoes.

Prevent Malaria With...

Treated mosquito nets

DEET repellents

Fabric sprays containing an insecticide

Loose, long-sleeved clothing in light coloured fabric

Prevention Better than Treatment

Resistance to antimalarial medicines has been a problem in recent years in...
Cambodia, Myanmar, Thailand and Vietnam.

Your Trip Planner

Find out where Malaria is a risk and how to protect yourself >
www.pyramidtravelproducts.co.uk/your-trip/

Protect the Most Vulnerable

Young children

Pregnant women

International travellers who lack immunity

People with HIV/AIDS

25 April **2016**
End malaria for good

WORLD MALARIA DAY
